HOME CARE INSTRUCTIONS FOR OPTIMAL RESULTS

Temporary Crown & Bridge

- Brush gently around your temporary crown each day.
- Floss down between the top of the teeth & then remove floss by pulling out from the side instead of back up.
- Avoid chewing gum, nuts, hard candies & sticky foods until permanent crown is placed.
- For quicker healing, rinse with warm salt water.
- If your temporary crown comes off, please call our office. Do not leave temporary crown out of mouth. Bring the temporary crown with you to be recemented or replaced.
- If pain, swelling or temperature sensitivity occurs, please contact our office.
- Keep follow-up appointments as directed.
